

## CLAIMS

1. (Currently amended) An entity records system for tracking information pertaining to a plurality of entities, the system comprising:

an entity identification capture means for recording ~~to record~~ identification information for each entity;

a revenue capture means for recording revenue information for the entity, wherein the revenue capture means is in data communication with the entity identification capture means ~~to record revenue information for the entity~~;

a delinquency data capture means for recording account delinquency information for each entity, wherein the delinquency data capture means is in data communication with the entity identification capture means ~~to record account delinquency information for each entity~~; and

a negative payment history capture means for tracking negative payment history for each entity, wherein the negative payment history capture means is in data communication with the entity identification capture means ~~to track the negative payment history for each entity~~.

2. (Currently amended) The entity records system of claim 1 wherein the entity identification information ~~capture~~ comprises a business name, an address, and a business telephone number.

3. (Currently amended) The entity records system of claim 1 wherein the entity identification information ~~capture~~ identifies a district number, a marketing number and a route number for a specified entity.

4. (Currently amended) The entity records system of claim 1 wherein the entity identification information includes ~~capture identifies the~~ business hours for a specified entity.

5. (Currently amended) The entity records system of claim 1 wherein the revenue information ~~capture~~ comprises a prior month commission total.

6. (Currently amended) The entity records system of claim 1 wherein the revenue information ~~capture~~ comprises a prior month gross revenue total.

7. (Currently amended) The entity records system of claim 1 wherein the revenue information capture comprises a year to date commission total.

8. (Currently amended) The entity records system of claim 1 wherein the revenue information capture comprises a year to date revenue total.

9. (Currently amended) The entity records system of claim 1 wherein the revenue information capture identifies a commission payment by displaying a check number, a check date and a check amount corresponding to the commission payment.

10. (Currently amended) The entity records system of claim 1 wherein the account delinquency information data capture comprises a delinquency count.

11. (Currently amended) The entity records system of claim 1 wherein the account delinquency information data capture identifies an account delinquency by providing a delinquency date and a reason for the delinquency.

12. (Currently amended) The entity records system of claim 10 wherein the account delinquency information data capture identifies an adjustment in the delinquency count.

13. (Currently amended) The entity records system of claim 1 wherein the negative payment history capture means comprises a bank returned check capture.

14. (Currently amended) The entity records system of claim 1 wherein the negative payment history capture means comprises a company returned check capture.

15. (Currently amended) The entity records system of claim 1 wherein the negative payment history capture means comprises a missing check capture.

16. (Currently amended) The entity records system of claim 1 wherein the negative payment history capture means comprises a missing bank deposit capture.

17. (Currently amended) The entity records system of claim 1 wherein the negative payment history capture means comprises a certified funds requirement indicator.

18. (Original) The entity records system of claim 1 further comprising a commission schedule for a specified entity.

19. (Original) The entity records system of claim 1 further comprising a commission check mailing address.

20. (Original) The entity records system of claim 1 further comprising an owner identification feature.

21. (Original) The entity records system of claim 1 further comprising a contract information capture.

22. (Original) The entity records system of claim 21 wherein the contract information capture includes an addendum information capture.

23. (Original) The entity records system of claim 1 further comprising a month to date adjustments capture.

24. (Original) The entity records system of claim 1 further comprising a year to date adjustments capture.

25. (Currently amended) An entity records system for tracking information pertaining to a plurality of entities, the system comprising:

an entity identification capture means for recording ~~to record~~ identification information for each entity; and

a revenue capture means for recording revenue information for the entity, wherein the revenue capture means is in data communication with the entity identification capture means ~~to record revenue information for the entity~~.

26. (Currently amended) The entity records system of claim 25 wherein the entity identification information capture ~~capture~~ comprises a business name, an address, and a business telephone number.

27. (Currently amended) The entity records system of claim 25 wherein the entity identification information capture identifies a district number, a marketing number and a route number for a specified entity.

28. (Currently amended) The entity records system of claim 25 wherein the entity identification information includes capture identifies the business hours for a specified entity.

29. (Currently amended) The entity records system of claim 25 wherein the revenue information capture comprises a prior month commission total.

30. (Currently amended) The entity records system of claim 25 wherein the revenue information capture comprises a prior month gross revenue total.

31. (Currently amended) The entity records system of claim 25 wherein the revenue information capture comprises a year to date commission total.

32. (Currently amended) The entity records system of claim 25 wherein the revenue information capture comprises a year to date revenue total.

33. (Currently amended) The entity records system of claim 25 wherein the revenue information capture identifies a commission payment by displaying a check number, a check date and a check amount corresponding to the commission payment.

34. (Currently amended) An entity records system for tracking information pertaining to a plurality of entities, the system comprising:

an entity identification capture means for recording ~~to record~~ identification information for each entity; and

a delinquency data capture means for recording account delinquency information for each entity, wherein the delinquency data capture is in data communication with the entity identification capture ~~to record account delinquency information for each entity.~~

35. (Currently amended) The entity records system of claim 34 wherein the account delinquency information data capture comprises a delinquency count.

36. (Currently amended) The entity records system of claim 34 wherein the account delinquency information data-capture identifies an account delinquency by providing a delinquency date and a reason for the delinquency.

37. (Currently amended) The entity records system of claim 35 wherein the account delinquency information data-capture identifies an adjustment in the delinquency count.

38. (Currently amended) An entity records system for tracking information pertaining to a plurality of entities, the system comprising:

an entity identification capture means for recording ~~to record~~ identification information for each entity; and

a negative payment history capture means for tacking negative payment history for each entity, wherein the negative payment history means is in data communication with the entity identification capture means ~~to track the negative payment history for each entity~~.

39. (Currently amended) The entity records system of claim 38 wherein the negative payment history capture means comprises a bank returned check capture.

40. (Currently amended) The entity records system of claim 38 wherein the negative payment history capture means comprises a company returned check capture.

41. (Currently amended) The entity records system of claim 38 wherein the negative payment history capture means comprises a missing check capture.

42. (Currently amended) The entity records system of claim 38 wherein the negative payment history capture means comprises a missing bank deposit capture.

43. (Currently amended) The entity records system of claim 38 wherein the negative payment history capture means comprises a certified funds requirement indicator.

44. (Original) A method of tracking information pertaining to a plurality of entities, the method comprising the steps of:

storing and retrieving entity identification data;

storing and retrieving revenue information pertaining to the entities;  
storing and retrieving delinquency data pertaining to the entities; and  
storing and retrieving negative payment history pertaining to the entities.

45. (Original) The method of claim 44, further comprising the steps of:  
providing a searchable database having a query field;  
wherein in response to the input of an entity identifier, at least one of the entity  
identification data, revenue information, delinquency data or negative payment history is  
displayed.
